Features:

- Patent pending polymer fire control housing holds all the fire control components in their proper dimensional relationships, reduces weight significantly, and helps reduce recoil.
- Patented friction reducing cam is the next generation design in fire control systems with an optimized cam that results in a smooth, non-stacking trigger pull.
- High-Strength stainless steel cylinder is extensively fluted (reducing weight) and features an Ionbond Diamondblack™ finish for excellent durability.
- Grip Peg allows a variety of grip styles to be installed, leaving ample room for recoil cushioning. Standard model has a Hogue® Tamer™ grip, which is highly effective at reducing felt recoil.
- Features an external hammer that allows it to be fired in single-action mode.
- Monolithic frame which supports cylinder and barrel, is made from aerospace grade, 7000 series aluminum in 22 LR, 22 WMR and 38 Special models.
- Also includes soft case.
